

Insurance Fundamental Financial Data

Comprehensive and accurate financial data on over 14,800 insurers in over 150 countries.

As a leading source of financial data on life and non-life insurers, composites, Lloyd's syndicates and brokers, our Insurance Fundamental Financial Data is used and checked by Fitch Ratings analysts, along with banks, investors, insurers, reinsurers and insurance brokers to save time collating data. It helps them identify risk indicators and assess the credit risk of insurance or reinsurance companies.

Key Highlights

Peer comparability for easier credit risk analysis

Conduct global peer and cross-border analysis easily with standardized financial data on over 14,800 private and public insurance firms across over 150 countries, along with up to 20 years of history. The data has been designed to be a perfect fit for credit risk work.

Work faster, with accurate data at your fingertips

We do the heavy lifting to collect, compile, standardize and deliver the data you need so you can focus on your core decision-making processes, risk-based assessments and investments. Perform critical insurance analysis with data offering a 99.95% accuracy rate that has been put through a rigorous data integrity process to identify any defects, including 75+ validations.

Transparency & expertise you can count on

We offer complete transparency on our data collection and standardization methodologies, with access to our data experts for further explanations whenever required.

In-depth financial statements for enhanced analysis

Analyze international insurance data at a granular level. Each financial statement contains up to 1300 data points under the new IFRS 17 template (where applicable), including new ratios to aid in your analysis and navigation of the new IFRS 17 reporting structure.

Up-to-date and timely data, so you can assess confidently

Face the new IFRS 17 accounting standard with confidence, with a new data template designed to meet the new requirements. Plus, you can start using data from annual and interim financial statements within days of filing.

The data you need, the way you want it

Data is available via API, Feeds, or Excel Add-in, to integrate seamlessly into your preferred environment, or you can access via our user-friendly web portal, Fitch Ratings PRO. Explore analytical tools and an intuitive search function, easily build portfolios, alerts and custom reports to speed up your workflows and cut down the risk of manual data handling errors.

A Trusted Provider of Credit Intelligence:

Fitch Ratings | Research & Data has a global, multi-lingual team who work around the clock to manually collect and translate statements sourced directly from regulatory bodies and financial institutions. All data is subject to a targeted data validation process to ensure it is of the highest quality before it ever reaches the Fitch Ratings PRO platform.

Data Integrity

Once financial statements have been collected and translated, a Data Input Analyst and Data Control Reviewer perform a two-stage review, and conduct 75+ validation tests within standardized templates.

Daily Validation Reports

Over 40 statement and entity level data validation reports (DVRs) are run daily, to review and identify any operational and data point anomalies.

Independent Audit Sampling & Targeted Data Checking

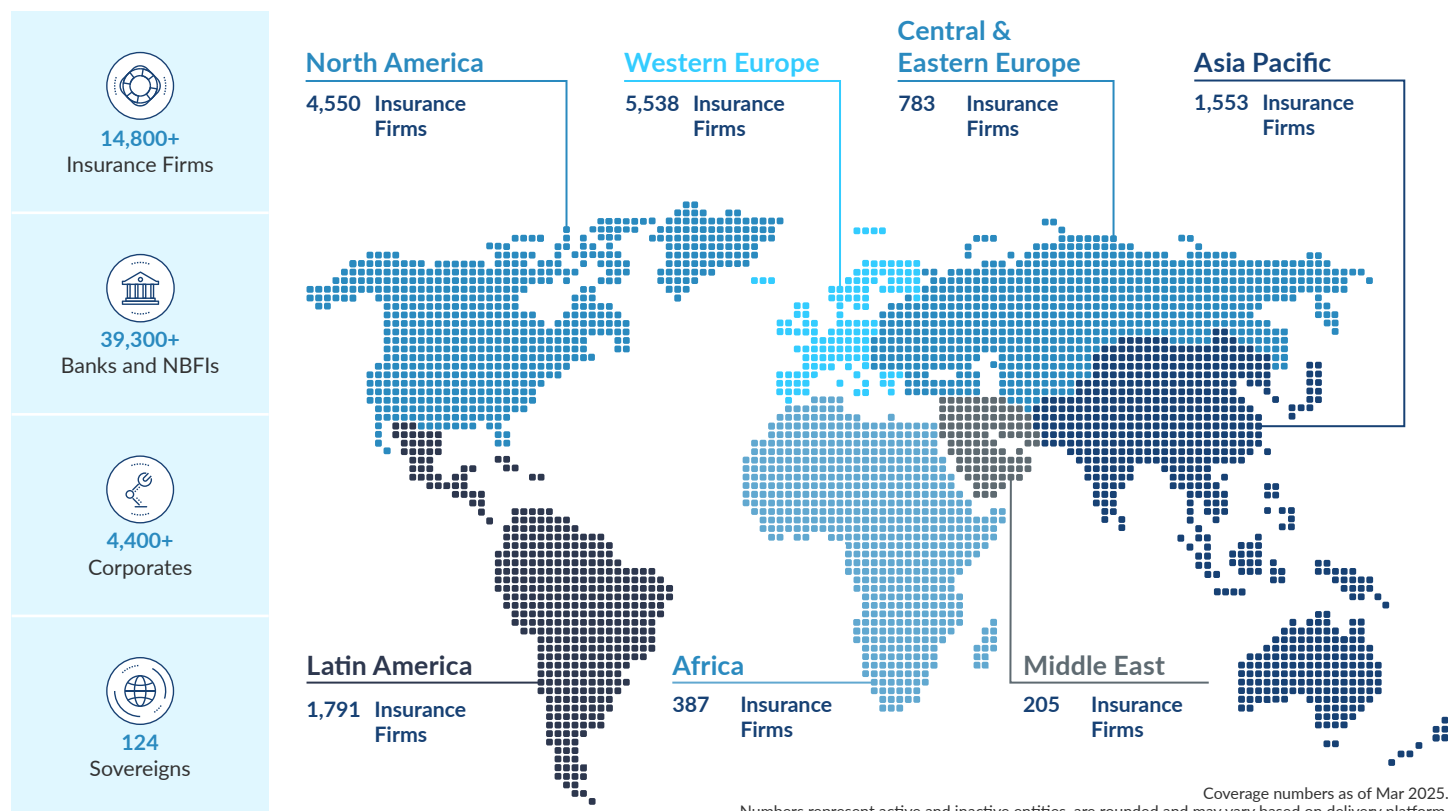

An independent group stringently compares sample data against financial statements, and checks specific countries' accounting standards or disclosure policies.

Root Cause Analysis

Root Cause Analysis is undertaken (when necessary) to identify any underlying reason for defects found in the data and to improve the business processes.
